OPP USGS Collaboration 2017 DD Briefing (2).pptx

Here is the most current one. It has mostly what ACB will be presenting. I need to work on the fonts, titles, and may be rewording some slides.

I am going to try and find a half hour for us to touch base on these slides. Kim mentioned to me that the subject of the DD briefing came up in their general with Wynne and we should probably revisit these.

My thinking is that this would be a collaborative presentation to them though I am fine with doing the whole thing. The slide set you all sent back really only has two slides that look to be lab specific so I was not sure if that was all you wanted in this or if more was forthcoming. Let's talk.

I am going to start looking for times with them in late April so we have some time

Yaorong added some slides. I have not reviewed them yet. Just sharing with you.

Here is a very rough slide set for the USGS presentation to the DD's. I have started to add a little more detail on the new Regional studies and get a little more emphasis on the back end of tangible uses of the data. Needs a lot of work but you will see the three or four slides you all used before on the Lab part. I am not wedded to any particular order at this point but thought now would be a good time to get you looking at your part and how you might want to tweak it, or redo it completely.

If you can work on this next week and send me back just the slides you want to present and where you think in the order they fit best that would help. I plan to keep working the non-lab part so sending the whole slide deck back might be harder to weave into wherever I am with this.

Yes, I saw your note about briefing Marietta and Wynne on the SQA work, and whether or not we should keep it within OPP or invite OW folks. Wynne said she will check with Yu-Ting and let me know. I have not heard from her yet.

Sounds good to me

Not sure if you saw my note but Marietta suggested we get a presentation together to update her and Wynne on the SQA work overall. I've started an update to the slides we used two years ago for Jim Jones to reflect the full range of data we have gotten or will get. I think she expects we would at least carry that forward to Rick so he is up to speed also

I hope to have a draft of that this week and will run it by you

Subject: ACB Plans for 2017 CSQA

Hi Mark,

We are planning to analyze the NEW 2017 CSQA samples the same as we did the 2016 NESQA samples .

Last year Denise Rice suggested that rather than writing a new QAPP each year for this multi-year study, that we just write an addendum for subsequent years that refers back to an earlier QAPP. Currently the ACB is re-evaluating the MDLs for each of the 2016 target analytes to see if there are any changes since last year. The Agilent instrument we have been using the past few years for NRSA is also used for other projects during the year so we want to make sure the instrument is still good to go.

We are expecting 2017 CSQA samples to begin arriving on/about March 24th, so I hope to send you a copy of the 2017 CSQA QAPP Addendum next week, based on last year's NESQA QAPP.....if that is OK with you.

Paul
